

Assignment1: Personal Portfolio Website

Objective: The objective of this project is to apply the knowledge you have gained about HTML, the basic structure of a webpage, and creating headings, paragraphs, lists, and links to create a personal portfolio website.

Instructions:

1. Project Description:

Create a personal portfolio website showcasing your skills, interests, and projects. This website will serve as a platform to highlight your achievements and showcase your work to potential employers or clients

2. Basic Structure:

Design the basic structure of your webpage using HTML.

Include a `<!DOCTYPE html>` declaration at the beginning.

Utilize `<html>`, `<head>`, and `<body>` tags to structure your page

3. Page Title and Heading:

Set the title of the page to "Your Name - Portfolio".

Create a `<h1>` heading with your name at the top of the page to serve as the main heading

4. About Me Section:

Add an "About Me" section using `<section>` or `<div>` tags.

Include a `<h2>` heading with the text "About Me".

Write a paragraph describing yourself, your background, and your interests. Highlight what makes you unique.

5. Skills and Interests:

Create an unordered list (``) or ordered list (``) to list your skills and interests. Include at least 3 items in each list.

6. Projects Section:

Add a section to showcase your projects.

For each project, include a heading (<h3>), a brief description, and a link to the project (if applicable).

7. Contact Information:

Create a section for your contact information.

Include your email address and optionally, links to your professional social media profiles (e.g., LinkedIn, GitHub).
